Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 29, 2004 has been entered.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the examiner has considered the amendment filed with the Request for Continued Examination (RCE) by applicants on November 29, 2004. Applicants have amended the claims such that the diester mixtures of the present invention are directed to esters with isononyl residues. The closest prior art of record, U.S. 2,070,770 to Amend, teaches only esters having linear residues. The declaration under 37 CFR 1.132 filed November 29, 2004 shows advantageous properties of the esters with branched residues of the present invention, specifically, esters with branched isononyl residues, with regard to strength and stability as plasticizers, in comparison to esters having linear residues, as taught by Amend. The instant claims (22-35) are therefore allowed in light of the declaration filed by applicants.
